All prices in this guide are ASKING prices observed via web search on 2026-08-11 from U.S.-facing retail and marketplace listings. They are reference points, NOT confirmed sale prices. Marketplace (Etsy/1stDibs) asking prices can sit above realised sale prices; where sales/review counts were visible they are noted. Because this build environment blocks direct page fetching, individual listing specs that were not visible in search results are marked "not disclosed" rather than guessed, and every listing should be re-verified at its URL before you rely on it. Practical retail ranges are derived from the observed listings (trimmed of single high/low outliers), never set first and back-filled.
